DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ichikawa et al (EP 1,068,883). Ichikawa discloses a golf ball comprising a core and at least one cover layer (abstract). The cover layer is formed of a rubber composition comprising at least 40% of cis-1,4 structure polybutadiene rubber (2, line 46), at least 5 parts of methacrylic acid (2, lines 53-55), at least 5 parts of a metal oxide (3, lines 1-2), and at least 0.1 part of a polymerization initiator (3, lines 12-15). Applicant discloses the cover of the present invention may be made from the core material (polybutadiene), therefore the maximum load value claimed by applicant is considered obvious over the Ichikawa. Ichikawa discloses a cover hardness of at least 65 JIS-C (41 Shore D) and a cover thickness of at from 0.5 to 3.5 mm (4, line 51). Since the materials for the cover layers are equivalent the maximum load values are also considered equivalent.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raeann Gorden whose telephone number is 703-308-8354. The examiner can normally be reached on M-F 9-5.
